The Easy, Affordable, Trusted Storage Cloud

Create a Backblaze B2 account and start storing data in just a few minutes at $5/TB per month. Backblaze has been a cloud storage innovator since 2007 and is trusted by over 500,000 customers with over a billion gigabytes of data.

Backblaze B2 is enterprise-grade, S3 compatible storage that companies around the world use to store and serve data while improving their cloud OpEx vs. Amazon S3 and others.

Developers use it to easily build apps and manage services. IT leaders use it to backup their organizations with management ease and reliability. Media-heavy teams use it to save time and headaches with their existing workflows and media tools. How will you use it?
